WORK EXPERIENCE

Deep Packet Inspection QA @Nokia (CO-OP)

Ottawa, ON | September 2024 - December 2024

Distinction: Excellent

- Analyzed network with TShark on Linux to test ML models.
- Innovated by developing a script to automate router ML algorithm maintenance, boosting team efficiency.
- Enhanced full stack of Nokia's internal Order Tracking System.

Software developer @Searidge Technologies (CO-OP)

Ottawa, ON | January 2024 - April 2024

Distinction: Exceptional

- Developed the backend for a real-time streaming platform using Node.js.
- Managed H.264 to WebRTC conversion using a GStreamer pipeline.
- Developed a complex, dynamic Gantt chart using React and D3, achieving pixel-perfect accuracy from the initial mockup.

Full-stack developer @Outstem (CO-OP)

Ottawa, ON | May 2023 - August 2023

Distinction: Excellent

- Translated UI mockups into pixel-perfect Angular web pages
- Handled server-side endpoints & SQL database changes for troubleshooting
- Provided accurate English-to-French translations for the website's French version

PERSONAL PROJECTS

OpenAI, React, Social Media

Founder & CEO @Sparksite.io

Sparksite is a tech company I founded that offers a platform enabling users to generate thousands of websites for businesses without one, using AI, all with a single click.

React MUI

Rate My Dog (winner project)

Built in a week as part of an interview process, it's a user-friendly website that fetches dog images from an API, and that enables the user to rate them. The ratings history is available as well, and is stored in the user's local machine.
